

## United Nations Environmental Programme

**Topic:** Biodiversity

**Co-Sponsors:** Adopted by Consensus by all Member States of the UNEP.

United Nations Environmental Programme,  
recognizing that this problem must be solved, creates  
a resolution to move forward with this,

Recognizing that 50,000 plants and animal species

are lost each year,

Noting that biodiversity loss is a devastating problem to our world,

Bearing in mind that we still need to kill animals for food,

Encouraging countries to help us solve this global crisis,

Stating that cars have already been made from eco-energy and we intend to make more,

1. Authorizes worldwide funding to create wildlife reserves;
2. Calls upon all nations to work to this problem;
3. Further requests putting a limit on killing non-sustainable animals;
4. Emphasizes the fact that we must help countries create better practices for commercial fishing;
5. Also recommends that we help animals in pain;
6. Creates a program where we can educate people about this issue;
7. Eradicates souvenirs made out of animals;
8. Suggests that the population begins to use and manufacture hybrid cars;
9. Reduces the amount of invasive alien species;
10. Establishes acts and laws to preserve the ecosystems (forests, biodiversity and more);
  - a. Recommends to increase protected areas for biodiversity;
11. Encourages to use alternative eco-friendly methods to power various devices;
12. Tells countries to sustain biodiversity by filtering factories water, and exhaust

before releasing it into the ocean and air;

13. Also suggests that all countries work with UN-REDD;

14. Requests more security and laws on poaching.
